Annual Report and Financial Statements 2020

Trafalgar Insurance Limited

Directors: J M Dye

F K Dyson

S C McGinn

Company Secretary: R C Jack-Kee

Registered Office: 57 Ladymead, Guildford, Surrey, GU1 1DB

Registered Company Number: 96205

Strategic Report

The Directors present their Strategic Report for the year ended December 31, 2020.

Principal activity

The Company ceased underwriting activity in 2006 and since that date has been actively managing the settlement and run-off of the remaining insurance contract liabilities.

Trafalgar Insurance Limited ("the Company") is a member of the Association of British Insurers and is authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority and the PRA. Its activities are covered by the Financial Ombudsman Service. The Company is a member of the Allianz Holdings plc group of companies ("the Group").

Business review

The impact of the Coronavirus disease ("COVID-19") is noted in Principal risks and uncertainties below.

The results for the year are set out in the Statement of Comprehensive Income on page 13. The profit for the year amounted to £439k (2019: £348k). The profit for the year arose from investment income and realised gains after the deduction of expenses and further costs incurred relating to claims liabilities. The Company formerly underwrote motor policies solely for brokers who were shareholders in Broker Direct Plc. The Company ceased underwriting private car business in 2004 and commercial vehicles in 2006. The Company's business operations are now solely in connection with the management of the run-off of the insurance contract liabilities.

During the year, the Company sold its entire portfolio of available for sale financial assets.

The Company approved a capital reduction, effective on November 20, 2020, whereby 32,000,000 ordinary shares of £1 each were cancelled and extinguished and the amount cancelled was returned to the Company's parent through an immediate dividend payment.

Key performance indicators

The financial key performance indicators monitored by the Company are profit before tax and net asset value.

The profit before tax for the year is £541k (2019: £429k). At the year end, the Company had net assets of £7,890k (2019: £39,732k⁽¹⁾). The decrease in the year is mainly driven by the dividend payment described above.

The Company does not monitor any non-financial key performance indicators.

Principal risks and uncertainties

The principal risk facing the Company is insurance risk. The Company's policies in respect of the management of risks and uncertainties are set out in note 17 on page 28.

On March 11, 2020 the World Health Organisation confirmed that the outbreak of COVID-19 was a global pandemic. This was a new and significant source of uncertainty for the Company in 2020, which continues into 2021. Preventative actions such as restricting the public on non-essential travel, working from home, closure of businesses, postponing events and stopping public gatherings were taken by the United Kingdom ("UK") government to varying degrees throughout 2020. Restrictive measures have continued into 2021. This had an immediate impact on the domestic and global economies, and financial markets, creating uncertainty for people and businesses which has been felt throughout the course of the pandemic. Consequently, insurance companies continue to assess the impact of COVID-19 on general insurance products as explained below.

The Company is closely monitoring the situation as it continues to develop, to maintain service to customers and manage both operational and economic risk. There is close alignment and interaction to ensure the Company is operating in accordance with government advice and benefiting from the wider Allianz Societas Europaea ("Allianz SE") Group response.

(1) For details concerning the restatement please refer to note 15.

Strategic Report (continued)

Principal risks and uncertainties (continued)

Our values continue to drive our decision making as we work through this challenging time, with a focus on putting our people first and prioritising existing, and emerging, customer needs.

The Company is responding to the COVID-19 situation using well-established business resilience and crisis management procedures. The key risks this crisis presents are both operational and financial. These risks are actively monitored and managed on a daily basis.

Regular communications are taking place to keep all staff informed throughout the period of uncertainty.

The operational risks from COVID-19 have been addressed by increasing homeworking capability and reducing non-priority activity. Work has been prioritised to support claims payments and existing customers.

The operational and financial impacts on the solvency position are being closely monitored in light of emerging risks. Our existing Risk Management Framework is designed to cope with stresses and is responding to the current crisis.

We continue to assess the level of solvency against our risk appetite and have defined a number of contingency actions we would take in the event that the solvency position becomes under stress and needs addressing.

The Company expects to continue to meet its solvency and capital requirements as required by regulation. The impact of COVID-19 is continuing to evolve, but the impact on the Company has been and continues to be insignificant.

Brexit

The UK formally left the European Union ("EU") on January 31, 2020 and a trade deal was agreed on December 23, 2020, coming into effect from January 1, 2021. The deal is not expected to have a significant impact on the Company's performance in 2021.

Future outlook

No changes to the principal activity are anticipated in the foreseeable future. The Company will continue to manage the run-off of its insurance contract liabilities. The uncertainties surrounding the COVID-19 pandemic are noted above.

Going concern

The Directors, having undertaken an assessment, are confident in the Company's ability to continue as a going concern. The business is well placed in managing the principal risks and uncertainties, has a strong financial, trading and capital position and is owned by one of the largest properties and casualty insurers in the world.

Section 172(1) Companies Act 2006 Statement

This statement sets out how the Directors have had regard to the matters set out in section 172(1) of the Companies Act 2006 when performing their duties. The Directors consider, both individually and collectively, they have acted in a way that, in good faith, would be most likely to promote the success of the Company for the benefit of its members as a whole and in doing so have had regard to the matters set out in section 172(1)(a) to (f) of the Companies Act 2006 in the decisions taken during the year.

The Company is a wholly owned subsidiary of Allianz Insurance plc ("AZI"), which is part of the Group. As a result of the governance structure of the Group, strategic decisions and matters which affect the whole Group are considered by the Board of Allianz Holdings plc ("AZH") or its committees to an appropriate extent for the Group as a whole. Certain Group stakeholders and their interests (including employees, community and the environment) are considered at and actions concerning them determined at a Group level by the AZH Board and its committees rather than at a subsidiary board level. Group strategy and stakeholder considerations are understood by the Company's Directors as they are members of the AZH Board and/or its principal executive committee, the Management Board. The Company's Directors have oversight of the Company's key activities through the reporting provided to and the oversight provided by the AZH Board and Management Board. However, while oversight is carried out at Group level, any decisions put to the Company's Board are considered from the perspective of the Company and its stakeholders. The Board meets quarterly to discuss matters relevant to the Company's business.

Stakeholders, their interests and the manner in which the Company engages with them, are integral to how the Group and the Company conduct business. When strategic and operational decisions are considered by the Board, the broader impacts on stakeholders are taken into account and this approach is embedded within the Group governance structure.

Strategic Report (continued)

Section 172(1) Companies Act 2006 (continued)

As the Company's business is now in run-off, the plan is to continue to run-off the Company in line with Solvency II regulations and within the defined risk appetite. Details of the Company's engagement activities in relation to its stakeholders are detailed below:

Policyholder/Claimants

The Company's claims handling services are provided by the Group's experienced team, which also provides such services to AZI. The services include ongoing supervision, claims handling skills, maintenance of system records (for both internal and any regulatory purposes) and continuity of service.

Reinsurers

The Company has the benefit of an excess of loss reinsurance programme backed by highly reputable reinsurers with a strong security rating and the Company is in regular communication with its reinsurers through the Group's experienced team and any significant matters are escalated to the Company's Board as required.

Regulators

Regulations, guidance, policy statements, Dear CEO letters, Dear CRO letters, reports and other forms of publication issued by the Company's regulators from time to time are examined and discussed by the AZH Board and Management Board to the extent relevant and taken into account by the Company when considering matters for approval. Where appropriate these deliberations are minuted. Other engagement methods with regulators include regular meetings and more detailed reviews. The Group prides itself on maintaining a candid and transparent relationship with all of its regulators. In relation to its regulatory requirements, the Board reviewed and approved its relevant Solvency II reports.

Shareholder

The Company has regard to the interests of the wider Group when making decisions. Engagement is enabled by way of the Board members also being members of the Board of AZH and/or its principal executive committee, the Management Board.

Community and the environment

As a subsidiary of the Group, the Company is acutely aware of the broader impact it has on its various environments, its customers and society in general, and adheres to and participates in the Group's corporate social responsibility policies and practices.

Board decision-making

During the year, the Board considered financial, risk and solvency related matters including approval of the Company's Annual Report and Solvency II reports and a quarterly review of investments and valuations. In addition, the Board took the following principal decision:

Capital reduction and subsequent distribution

Section 172 considerations: promoting the success of the Company for the benefit of the Company's members, long-term consequences, maintaining a reputation for high standards, consideration of customers and other stakeholders

Stakeholders: Regulator, policyholders, shareholder

During the year the Board reviewed a proposal to reduce the capital of the Company by £32,000k and following the required legal process this amount was subsequently returned to the Company's shareholder by way of an immediate dividend payment. The Board considered information relating to the Company's financial position, solvency position, its latest regulatory reports and information from the Group Chief Risk Officer. The Board considered whether the capital reduction and dividend payment would have any detrimental impact on policyholders or claimants while the Company continued to be in run-off and concluded that the Company would have sufficient capital to meet its obligations. The Board also consulted with its Regulator, as required. Following due consideration of all the information available to the Directors and consideration of the relevant stakeholders, the Board recommended the capital reduction for shareholder approval (which was duly received) and approved the related dividend distribution.

Strategic Report (continued)

Section 172 (1) Companies Act 2006 (continued)

Employees

The Company does not employ any staff. During the year, Allianz Management Services Limited ("AMS"), a company within the Group, provided administration services and staff to the Company and to other Group companies. AMS has a high level of resources and expertise to benefit the Company.

By order of the Board

F K Dyson Director April 20, 2021

Directors' Report

The Directors present their report and the audited financial statements for the year ended December 31, 2020.

Stakeholder Engagement

Details of how the Board has had regard to the need to foster the Company's business relationships with suppliers, customers and other stakeholders and the effect of that regard on the principal decisions taken by the Company's Board is contained in the Section 172(1) statement of the Strategic Report on page 2.

Directors

The Directors of the Company who were in office during the year are shown on page 1.

Following the year end, R C Jack-Kee resigned as Company Secretary on February 1, 2021 and C M Twemlow was appointed as Company Secretary on February 1, 2021.

Results and dividends

The results for the year are set out in the Strategic Report on page 1.

As described in the Strategic Report, an interim dividend of £32,000k was paid for the year ended December 31, 2020 (2019: £nil). The Directors do not recommend the payment of a final dividend for the year ended December 31, 2020 (2019: £nil).

Future outlook

The future outlook for the Company is outlined in the Strategic Report on page 2.

Going concern

The Directors' going concern assessment has been outlined in the Strategic Report on page 2.

Financial Instruments

The Company's policies in respect of its use of financial instruments are set out in Note 17.

Directors' responsibility to the auditors

So far as the Directors are aware there is no relevant audit information of which the Company's auditors are unaware. The Directors have taken all steps that they ought to have taken as Directors to make themselves aware of any relevant audit information and to establish that the Company's auditors are aware of that information.

Auditors

Pursuant to section 487(2) of the Companies Act 2006, PricewaterhouseCoopers LLP will have been deemed to be re-appointed as auditors at the end of 28 days beginning with the day on which copies of these report and accounts are sent to members.

By order of the Board

F K Dyson Director

April 20, 2021

Statement of Directors' Responsibilities in Respect of the Strategic Report, the Directors' Report and the Financial Statements

The Directors are responsible for preparing the Annual Report and the financial statements in accordance with applicable law and regulation.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have prepared the financial statements in accordance with International Accounting Standards in conformity with the requirements of the Companies Act 2006.

Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that period. In preparing the financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- state whether applicable international accounting standards in conformity with the requirements of the Companies Act 2006 have been followed, subject to any material departures disclosed and explained in the financial statements;
- · make judgements and accounting estimates that are reasonable and prudent; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The directors are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Company's transactions and disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the financial statements comply with the Companies Act 2006.

The directors are responsible for the maintenance and integrity of the company's website. Legislation in the United Kingdom governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

By order of the Board

F K Dyson Director April 20, 2021

Report on the audit of the financial statements

Opinion

In our opinion, Trafalgar Insurance Limited's financial statements:

- give a true and fair view of the state of the Company's affairs as at 31 December 2020 and of its profit and cash flows for the year then ended;
- have been properly prepared in accordance with international accounting standards in conformity with the requirements of the Companies Act 2006; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

We have audited the financial statements, included within the Annual Report, which comprise: the Balance Sheet as at 31 December 2020; the Statement of Comprehensive Income, the Statement of Cash Flows, the Statement of Changes in Equity for the year then ended; and the notes to the financial statements, which include a description of the significant accounting policies.

Our opinion is consistent with our reporting to the Audit Committee.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities under ISAs (UK) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, which includes the FRC's Ethical Standard, as applicable to public interest entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

To the best of our knowledge and belief, we declare that non-audit services prohibited by the FRC's Ethical Standard were not provided.

We have provided no non-audit services to the Company in the period under audit.

Our audit approach

Overview

Audit scope

We performed a full scope audit of the financial statements of the Company in accordance with our risk assessment and
materiality. In doing so, we also considered qualitative and quantitative factors across all financial statement line items in the
financial statements.

Key audit matters

- Valuation of Insurance Contract Liabilities
- Impact of Covid-19

Materiality

- Overall materiality: £79 thousand (2019: £391 thousand) based on 1% of Net Assets.
- Performance materiality: £59 thousand.

The scope of our audit

As part of designing our audit, we determined materiality and assessed the risks of material misstatement in the financial statements.

Capability of the audit in detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined in the Auditors' responsibilities for the audit of the financial statements section, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud, is detailed below.

Based on our understanding of the Company and industry, we identified that the principal risks of non-compliance with laws and regulations related to breaches of UK and European regulatory principles, such as those governed by the Prudential Regulation Authority ("PRA") and the Financial Conduct Authority ("FCA"), and we considered the extent to which non-compliance might have a material effect on the financial statements. We also considered those laws and regulations that have a direct impact on the preparation of the financial statements such as the Companies Act 2006. We evaluated management's incentives and opportunities for fraudulent manipulation of the financial statements (including the risk of override of controls), and determined that the principal risks were related to management bias in accounting estimates and judgemental areas of the financial statements such as the valuation of insurance contract liabilities. Audit procedures performed by the engagement team included:

- Discussions with the Board of Directors, management, internal audit, senior management involved in the risk and compliance
 functions and the Company's legal function, including consideration of known or suspected instances of non-compliance with
 laws and regulation and fraud.
- Evaluating management's internal controls designed to prevent and detect irregularities.
- Assessing matters reported on the Company's whistleblowing helpline and fraud report and the results of management's investigation of such matters.
- Reading key correspondence with the Prudential Regulation Authority and the Financial Conduct Authority in relation to compliance with laws and regulations.
- Procedures relating to the valuation of insurance contract liabilities described in the related key audit matter section below.
- · Attending relevant meetings of the Audit Committee and reviewing meeting minutes including those of the Board of Directors.
- Identifying and testing journal entries, in particular any journal entries posted with unusual account combinations or posted by senior management.
- · Designing audit procedures to incorporate unpredictability around the nature, timing or extent of our testing.

There are inherent limitations in the audit procedures described above. We are less likely to become aware of instances of non-compliance with laws and regulations that are not closely related to events and transactions reflected in the financial statements. Also, the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion.

Key audit matters

Key audit matters are those matters that, in the auditors' professional judgement, were of most significance in the audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) identified by the auditors, including those which had the greatest effect on: the overall audit strategy; the allocation of resources in the audit; and directing the efforts of the engagement team. These matters, and any comments we make on the results of our procedures thereon, were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

This is not a complete list of all risks identified by our audit.

The key audit matters below are consistent with last year.

Key audit matter

Valuation of Insurance Contract Liabilities

Insurance contract liabilities are based on an estimated ultimate cost of all claims incurred but not settled at 31 December 2020, whether reported or not, together with the related claims handling costs. The valuation of these insurance contract liabilities is a significant accounting estimate in the financial statements and involves a significant degree of judgement.

The Company has been in run-off for a number of years. Due to the historic nature of the liabilities, the directors monitor and understand the movements on any emerging trends in key metrics, in total and for each class of business, and on Periodic Payment Orders ("PPOs") on the UK motor class of business including the relevant discount rate.

The key area of focus this year was the risk that estimates in respect of PPOs are inappropriate. There is significant judgement involved in the estimation of such losses, particularly as they are often estimated based on limited data

Refer to Note 1 for the accounting policies for insurance contract liabilities, and Notes 2, 13 and 14 for disclosure of the related judgements and estimates.

How our audit addressed the key audit matter

In performing our audit over insurance contract liabilities we have used actuarial specialists as part of our team to conduct some of the testing. Our procedures included:

- Testing the methodologies and assumptions used by the directors to derive their gross and net of reinsurance claims liabilities as at 31 December 2020, and whether these produced reasonable estimates based on the Company's facts and circumstances.
- Independently estimating the valuation of PPO liabilities using the results of our methodologies and assumptions testing, and comparing our estimates to those booked by the directors.

In performing the above, we have also considered and tested the following:

- The underlying relevant data (including but not limited to claims case estimates and paid claims) to relevant audit evidence.
- The directors' assessment of estimation uncertainty.

Based on the work performed and evidence obtained, we were satisfied with the insurance contract liabilities booked.

Impact of Covid-19

The impacts of the global pandemic due to the Coronavirus ("Covid-19") continue to cause significant social and economic disruption up to the reporting date. Management have performed procedures to assess the financial and operational impact of Covid-19 which included:

- Assessing that the solvency coverage ratio continues to meet regulatory requirements, and to meet liabilities as they fall due. The directors have concluded that the Company is a going concern.
- Operational analysis for key business functions.
- Frequent monitoring of the Company's solvency coverage ratio through regular meetings of the Crisis Management team.
- Communications with the PRA.

In assessing management's consideration of the impact of Covid-19 on the Company we have performed the following procedures:

- Obtained the directors' going concern assessment including the impact of Covid-19.
- Evaluated management's solvency position and challenged management's key assumptions. As the Solvency Capital Requirement and Risk Margin are not subject to audit, we considered the governance over the production of this information and its consistency with other available information and our understanding of the business.
- Considered and tested the underlying relevant data (including but not limited to the cash pooling arrangement with Allianz SE and reinsurance assets) that support the solvency analysis.
- Reviewed board papers on Covid-19 and discussed the solvency analysis with those charged with governance.
- · Reviewed correspondence with the PRA.
- Assessed the disclosures made by management in the financial statements and checked the consistency of the disclosures with our knowledge of the Company based on our audit and the other procedures listed here.

Based on the work performed and the evidence obtained, we consider the disclosure of the impact of Covid-19 in the financial statements to be appropriate.

How we tailored the audit scope

We tailored the scope of our audit to ensure that we performed enough work to be able to give an opinion on the financial statements as a whole, taking into account the structure of the Company, the accounting processes and controls, and the industry in which it operates.

The Company is a UK domiciled insurer. In determining the scope of the audit, we performed risk assessment procedures which included understanding the business operations, the internal control environment and management's process for the preparation of the financial statements. We applied our materiality benchmark across each financial statement line item to identify which line items were significant to the audit of the Company.

Where the work was performed by the Allianz SE group auditor, we determined the level of involvement we needed as the Company audit team of those auditors to be able to conclude whether sufficient and appropriate audit evidence had been obtained as a basis for our opinion on the financial statements as a whole. We maintained regular and timely communication with the group auditor including video and phone calls and discussions, where appropriate.

Materiality

The scope of our audit was influenced by our application of materiality. We set certain quantitative thresholds for materiality. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures on the individual financial statement line items and disclosures and in evaluating the effect of misstatements, both individually and in aggregate on the financial statements as a whole.

Based on our professional judgement, we determined materiality for the financial statements as a whole as follows:

Overall company materiality	£79 thousand (2019: £391 thousand).
How we determined it	1% of Net Assets.
Rationale for benchmark applied	We consider net assets as the primary measure used by the shareholders in assessing the insurance run-off activities of the Company.

We use performance materiality to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements exceeds overall materiality. Specifically, we use performance materiality in determining the scope of our audit and the nature and extent of our testing of account balances, classes of transactions and disclosures, for example in determining sample sizes. Our performance materiality was 75% of overall materiality, amounting to £59 thousand for the Company financial statements.

In determining the performance materiality, we considered a number of factors - the history of misstatements, risk assessment and aggregation risk and the effectiveness of controls - and concluded that an amount at the upper end of our normal range was appropriate.

We agreed with the Audit Committee that we would report to them misstatements identified during our audit above £4 thousand (2019: £20 thousand) as well as misstatements below that amount that, in our view, warranted reporting for qualitative reasons.

Conclusions relating to going concern

Our evaluation of the directors' assessment of the Company's ability to continue to adopt the going concern basis of accounting included:

- Obtaining the directors' going concern assessment including the impact of Covid-19.
- Evaluating management's solvency position and challenging management's key assumptions. As the Solvency Capital Requirement and Risk Margin are not subject to audit, we considered the governance over the production of this information and its consistency with other available information and our understanding of the business.
- Considering and testing the underlying relevant data (including but not limited to the cash pooling arrangement with Allianz SE and reinsurance assets) that support the solvency scenario analysis.
- Reading board papers on Covid-19 and discussing the solvency analysis with those charged with governance.
- Reviewing correspondence with the PRA.
- Assessing the disclosures made by management in the financial statements and checked the consistency of the disclosures
 with our knowledge of the Company based on our audit and the other procedures listed here.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the Company's ability to continue as a going concern.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Reporting on other information

The other information comprises all of the information in the Annual Report other than the financial statements and our auditors' report thereon. The directors are responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

With respect to the Strategic Report and Directors' Report, we also considered whether the disclosures required by the UK Companies Act 2006 have been included.

Based on our work undertaken in the course of the audit, the Companies Act 2006 requires us also to report certain opinions and matters as described below.

Strategic Report and Directors' Report

In our opinion, based on the work undertaken in the course of the audit, the information given in the Strategic Report and Directors' Report for the year ended 31 December 2020 is consistent with the financial statements and has been prepared in accordance with applicable legal requirements.

In light of the knowledge and understanding of the Company and its environment obtained in the course of the audit, we did not identify any material misstatements in the Strategic Report and Directors' Report.

Responsibilities for the financial statements and the audit

Responsibilities of the directors for the financial statements

As explained more fully in the Statement of Directors' Responsibilities in Respect of the Strategic Report, the Directors' Report and the Financial Statements, the directors are responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view. The directors are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Our audit testing might include testing complete populations of certain transactions and balances, possibly using data auditing techniques. However, it typically involves selecting a limited number of items for testing, rather than testing complete populations. We will often seek to target particular items for testing based on their size or risk characteristics. In other cases, we will use audit sampling to enable us to draw a conclusion about the population from which the sample is selected.

A further description of our responsibilities for the audit of the financial statements is located on the FRC's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the Company's members as a body in accordance with Chapter 3 of Part 16 of the Companies Act 2006 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Other required reporting

Companies Act 2006 exception reporting

Under the Companies Act 2006 we are required to report to you if, in our opinion:

- we have not obtained all the information and explanations we require for our audit; or
- adequate accounting records have not been kept by the Company, or returns adequate for our audit have not been received from branches not visited by us; or
- certain disclosures of directors' remuneration specified by law are not made; or
- the financial statements are not in agreement with the accounting records and returns.

We have no exceptions to report arising from this responsibility.

Appointment

Following the recommendation of the Audit Committee, we were appointed by the directors on 9 May 2018 to audit the financial statements for the year ended 31 December 2018 and subsequent financial periods. The period of total uninterrupted engagement is 3 years, covering the years ended 31 December 2018 to 31 December 2020.

For the year ended December 31, 2020

1. ACCOUNTING POLICIES

1.1. Company and its operations

The Company is a private limited company incorporated and domiciled in England and Wales.

1.2. Statement of compliance

The financial statements of the Company have been prepared and approved by the Directors in accordance with International accounting standards in conformity with the requirements of the Companies Act 2006.

1.3. Basis of preparation

The financial statements have been prepared on the historical cost basis except for the following assets that are stated at their fair value:

· Financial assets classified as available for sale

The functional and presentational currency is British Pounds.

Going concern

These financial statements have been prepared on a going concern basis. For more information on the going concern assessment please refer to the Strategic Report on page 2.

UK-adopted international accounting standards

On December 31, 2020, EU-adopted IFRS was brought into UK law and became UK-adopted international accounting standards, with future changes to IFRS being subject to endorsement by the UK Endorsement Board ("UKEB").

New standards and interpretations adopted by the Company

There are no new standards and interpretations that are mandatorily effective from January 1, 2020.

New standards and interpretations not yet adopted by the Company

A number of new standards and interpretations which are not mandatorily effective have not been applied in preparing these financial statements. The Company does not plan to adopt these standards early; instead it will apply them from their effective dates as determined by their dates of UKEB endorsement. The Company is still reviewing the upcoming standards to determine their impact:

- IFRS 17 Insurance Contracts In May 2017 the International Accounting Standards Board ("IASB") issued IFRS 17 and it was amended in June 2020. It will replace IFRS 4 'Insurance Contracts' for annual reporting periods beginning on or after January 1, 2023. The Company has completed an initial parallel run of the financial results under IFRS 17 in line with the "One. Finance" project to understand the impact of these changes. The Company is now refining new and updated processes whilst working with Allianz SE to ensure alignment of accounting policies, this is expected to be complete by 2022 to ensure compliance with the standard.
- IFRS 9 Financial Instruments IFRS 9 'Financial Instruments' replaces IAS 39 'Financial Instruments: Recognition and Measurement' and changes the classification and measurement of financial assets, based on the business model under which they are held, as well as hedge accounting requirements and recognising expected credit losses. The Company, based on the impact assessment performed under the One.Finance project, will take advantage of the exemption available as its activities are predominantly insurance related to defer applying IFRS 9 'Financial Instruments' (which would otherwise be applicable for annual reporting periods beginning on or after 1 January 2018) until 1 January 2023 which will coincide with the expected implementation of IFRS 17.

As of December 31, 2015, the Company's total carrying amount of liabilities connected with insurance amounted to £8,228k which represented more than 90% of its total liabilities of £8,543k. No change in the activities of the Company has occurred subsequently that would have required a reassessment.

For the year ended December 31, 2020

1. ACCOUNTING POLICIES (continued)

1.3 Basis of preparation (continued)

The following table provides an overview of the fair values as of December 31, 2020 and the amounts of change in the fair values during the year separately for financial assets that meet the solely payments of principal and interest ("SPPI") criterion (i.e. financial assets with contractual terms that give rise on specified dates to cash flows that are SPPI on the principal amount outstanding, or that is managed and whose performance is evaluated on a fair value basis) and all other financial assets:

Financial assets under IFRS 9 classification rules

As of December 31, 2020	Financial assets that i	Financial assets that meet the SPPI criterion		
		Fair Value change during		
	Fair Value	the year		
	£'000	£'000		
Cash and cash equivalents	54	-		
Total	54	-		

The cash and cash equivalents are "A" rated.

1.4. Summary of significant accounting policies

The significant accounting policies adopted in the preparation of the financial statements are set out in the following paragraphs.

(a) Income taxes

Income tax on the profit or loss for the year comprises current tax and deferred tax. Income tax is recognised in the Statement of Comprehensive Income. Current tax and deferred tax shall be recognised outside profit or loss if the tax relates to items that are recognised, in the same or a different period, outside profit or loss.

Current tax is the expected tax payable on the taxable income for the period, using tax rates enacted or substantially enacted at the Balance Sheet date, together with adjustments to tax payable in respect of prior years.

Deferred income tax is provided in full using the liability method and all temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the Balance Sheet date. The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of the assets and liabilities, using tax rates enacted or substantially enacted at the Balance Sheet date.

Deferred income tax assets are only recognised to the extent that it is probable that future taxable profits will be available against which the temporary difference can be utilised. The carrying amount of the deferred income tax assets are reviewed at each Balance Sheet date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the deferred tax asset to be utilised.

Group tax losses are utilised when available. Consideration paid for group relief is accounted for in the financial statements as though the payment had been made to the relevant tax authorities.

(b) Reinsurance assets

The Company cedes reinsurance in the normal course of business. Reinsurance assets primarily include balances due from both insurance and reinsurance companies for ceded insurance liabilities. Amounts due from reinsurers are estimated in a manner consistent with the associated reinsured policies and in accordance with the reinsurance contract. Premiums ceded and claims reimbursed are presented on a gross basis.

An impairment review is performed on all reinsurance assets when an indication of impairment occurs. Reinsurance assets are impaired only if there is objective evidence that the Company may not receive all amounts due to it under the terms of the contract and that this can be measured reliably.

For the year ended December 31, 2020

- 1. ACCOUNTING POLICIES (continued)
- 1.4. Summary of significant accounting policies (continued)

(c) Financial assets

The Company classifies its investments as available for sale financial assets.

All purchases of financial assets are recognised on the trade date i.e. the date that the Company commits to purchase the assets. All sales of financial assets are recognised on the statement date i.e. the date the assets are delivered to the counterparty.

All investments are initially recognised at fair value plus the transaction costs that are directly attributable to the acquisition of the investment. A financial asset shall be derecognised when the contractual right to receive cash flows expire or when the asset is transferred.

Available for sale financial assets, after initial recognition, are measured at fair value. Unrealised gains and losses are reported as a separate component of equity until the investment is derecognised or the investment is determined to be impaired. On derecognition or impairment, the cumulative gain or loss previously reported in equity is transferred to the statement of comprehensive income.

Impairments

The carrying value of all financial assets is reviewed for impairment whenever events or circumstances indicate that the carrying amount may not be recoverable. The identification of impairment and the determination of recoverable amounts is an inherently uncertain process involving various assumptions and factors, including the financial condition of the counterparty, expected future cash flows, observable market prices and expected net selling prices.

In order to determine whether negative revaluations on investment securities correctly represent impairment, all investment securities for which the market value has either fallen significantly below cost price or been below cost price for a considerable period of time, are individually reviewed. A distinction is made between negative revaluations due to general market fluctuations and due to issuer specific developments. The impairment review focuses on issuer specific developments regarding financial condition and future prospects, taking into account the intent and ability to hold the securities under the long term investment strategy of the Company.

For available for sale assets, a significant prolonged decline in the fair value indicates an impairment. For available for sale financial assets the impairment loss is the difference between its current fair value and its original cost.

(d) Fair value reserve

The fair value reserve relates to cumulative changes in the fair value of available for sale financial assets until the investment is derecognised or the investment is determined to be impaired.

(e) Insurance receivables

The carrying value is reviewed for impairment whenever events or circumstances indicate that the carrying amount may not be recoverable, with the impairment loss recorded in the Statement of Comprehensive Income.

(f) Other receivables

Other receivables (including prepayments and accrued income) are initially recognised and subsequently measured at amortised cost after taking into account any impairment losses. Other receivables shall be derecognised when the contractual right to receive cash flows expire or when the asset is transferred.

(g) Cash and cash equivalents

Cash and cash equivalents comprise cash at bank and in hand and short term deposits with an original maturity of three months or less at the date of placement, free of any encumbrances.

(h) Product classification

Insurance contracts are defined as those containing significant insurance risk at the inception of the contract, or those where at the inception of the contract there is a scenario with commercial substance where the level of insurance risk may be significant. The significance of insurance risk is dependent on both the probability of an insured event and the magnitude of its potential effect.

For the year ended December 31, 2020

1. ACCOUNTING POLICIES (continued)

1.4. Summary of significant accounting policies (continued)

(i) Insurance contract liabilities

Insurance contract liabilities are based on the estimated ultimate costs of all claims incurred but not settled at the Balance Sheet date, whether reported or not, together with related claims handling costs. Significant delays can be experienced in the notification and settlement of certain types of claims, the ultimate cost of which cannot be known with certainty at the Balance Sheet date.

(i) Accruals and other liabilities

Accruals and other liabilities are obligations to pay for goods or services that have been acquired in the ordinary course of business. They are initially recognised and subsequently measured at cost because they are expected to be settled within twelve months and their carrying value is a reasonable approximation of fair value.

(k) Revenue recognition

Investment income

Interest income is recognised in the Statement of Comprehensive Income as it accrues, taking into account the effective yield of the assets or an applicable floating rate. Interest income includes the amortisation of any discount or premium.

Net realised gains/(losses)

Realised gains and losses on the sale of available for sale financial assets are calculated as the difference between net sales proceeds and the original, amortised or impaired cost. Realised gains and losses are recognised in the Statement of Comprehensive Income when the sale transaction occurred.

(I) Claims incurred

Claims incurred include all losses occurring during the year, whether reported or not, including the related handling costs and any adjustments to claims outstanding from previous years.

Claims handling costs include internal and external costs incurred in connection with the negotiation and settlement of claims. Internal costs include all direct expenses of the claims department and any part of the general administrative costs directly attributable to the claims function.

(m) Insurance related payables

Insurance payables are recognised when due and measured on initial recognition at fair value of the consideration expected to be payable.

2. USE OF CRITICAL ESTIMATES, ASSUMPTIONS AND JUDGEMENTS

The Company makes estimates, assumptions and judgements that affect the reported amounts of assets and liabilities. Estimates, assumptions and judgements are continually evaluated and based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The following are the critical judgements, estimations and assumptions that the Directors have made in the process of applying accounting policies and that have the most significant effect on the amounts recognised in the financial statements.

Valuation of general insurance contract liabilities

For general insurance contracts, estimates are made for the expected ultimate cost of claims reported as at the Balance Sheet date and the cost of claims incurred but not yet reported ("IBNR") to the Company. It can take a significant period of time before the ultimate cost of claims can be established with certainty, and the final outcome may be better or worse than that provided. To the extent that the ultimate cost is different from the estimate, where experience is better or worse than that assumed, the surplus or deficit will be credited or charged to the Statement of Comprehensive Income in future years.

The annuity type structure of Periodic Payment Orders ("PPOs") claim payments, i.e. they are typically paid annually over the claimant's life, means that these have to be projected over a long period and reserved for on a discounted basis accordingly.

For the year ended December 31, 2020

2. USE OF CRITICAL ESTIMATES, ASSUMPTIONS AND JUDGEMENTS (continued)

Significant accounting estimate - Insurance contract liabilities

The estimation of the ultimate liability arising from claims made under insurance contracts is the most critical accounting estimate for the general insurance business. For general insurance contracts estimates are made for the expected ultimate cost of claims as at the Balance Sheet date and the cost of claims incurred but not yet reported. The Company has been in run-off since 2007 and no newly reported claims are expected. It can take a significant period of time before the ultimate cost of claims can be established with certainty, and the final outcome may be better or worse than that provided.

The main source of uncertainty is the two PPO claims which are projected over a long time period and are sensitive to assumed future inflation.

Significant judgement applied to estimate

While management believes the insurance contract liabilities carried at year end are adequate, the application of statistical techniques requires significant judgement.

The estimation of the PPO claims is based on a discounted cashflow approach with assumptions required around claimant life expectancy and future inflation.

The carrying value at Balance Sheet date for these general insurance contracts is £8,305k (2019: £7,299k).

3. INVESTMENT INCOME

	2020	2019
	£'000	£'000
Interest income	401	464

4. EMPLOYEE RELATED COSTS

The Company has no employees and as such incurs no employee related costs.

5. AUDITORS' REMUNERATION

The total remuneration payable by the Company excluding VAT, to its auditors in respect of the audit of these financial statements, is shown below. The Company's audit fees are borne by AMS. Other services supplied pursuant to legislation were £nil (2019: £nil).

7. DIRECTORS' EMOLUMENTS

J M Dye, F K Dyson and S C McGinn were not directly remunerated for their roles as Directors of the Company. Directors' emoluments are paid by AMS, a fellow AZH subsidiary, on behalf of the Group.

8. DIVIDENDS

As described in the Strategic Report an interim dividend of £32,000k was paid for the year ended December 31, 2020 (2019: £nil). The Directors do not recommend the payment of a final dividend for the year ended December 31, 2020 (2019: £nil).

9. REINSURANCE ASSETS

		Restated ⁽¹⁾
	2020	2019
	£'000	£'000
Reinsurers' share of insurance contract liabilities	7,280	6,607

⁽¹⁾For more detail on the restatement please refer to note 13.

The amounts disclosed above are a reasonable approximation for fair value at year end. For the current and non-current split, please refer to note 13.

For the year ended December 31, 2020

10. AVAILABLE FOR SALE FINANCIAL ASSETS

	2020	2019
Available for sale financial assets	£'000	£'000
Debt securities at fair value		35,954
Debt securities at cost		35,615

During 2020, the Company sold its available for sale financial assets resulting in realised gains of £577k (2019:£nil) and realised losses of £7k (2019: £1k).

11. INSURANCE AND OTHER RECEIVABLES

		Restated ⁽²⁾
	2020	2019
	£'000	£'000
Due from reinsurers	175	68
Amounts due from related parties	8,884	4,112
Total insurance and other receivables	9,059	4,180

⁽¹⁾ Included in amounts due from reinsurers are balances due from related parties of £15k (2019: £32k).

(2)For more detail on the restatement please refer to note 15.

The carrying amounts disclosed above reasonably approximate fair values at year end. All of the Company's insurance and other receivables are due within 12 months of the Balance Sheet date.

12. SHARE CAPITAL

	2020	2019
	£	£
Ordinary shares of £1 each fully paid at January 1	38,000,000	38,000,000
Share capital reduction	(32,000,000)	
Ordinary shares of £1 each fully paid at December 31	6,000,000	38,000,000

The Company approved a capital reduction, effective on November 20, 2020, whereby 32,000,000 ordinary shares of £1 each were cancelled and extinguished. The amount cancelled was returned to the Company's parent through an immediate dividend payment.

For the year ended December 31, 2020

13. INSURANCE CONTRACT LIABILITIES

				Restated ⁽¹⁾	Restated(1)	
		2020			2019	
	Insurance contract liabilities	Reinsurers' share of liabilities	Net	Insurance contract liabilities	Reinsurers' share of liabilities	Net
	£'000	£'000	£'000	£'000	£'000	£'000
Provision for claims reported by policyholders	8,305	(7,280)	1,025	7,299	(6,607)	692
Current general insurance contract liabilities	206	(194)	12	253	(241)	12
Non-current general insurance contract liabilities	8,099	(7,086)	1,013	7,046	(6,366)	680

The provision for claims reported by policyholders and IBNR may be analysed as follows:

				Restated ⁽¹⁾	Restated ⁽¹⁾	
		2020			2019	
	Insurance contract liabilities	Reinsurers' share of liabilities	Net	Insurance contract liabilities	Reinsurers' share of liabilities	Net
	£'000	£'000	£'000	£'000	£'000	£'000
At January 1	7,299	(6,607)	692	7,266	(6,533)	733
Unwind of discount	190	(171)	19	222	(202)	20
Movement on claims incurred in prior accident years	1,045	(694)	351	29	(61)	(32)
Claims paid during the year	(229)	192	(37)	(218)	189	(29)
At December 31	8,305	(7,280)	1,025	7,299	(6,607)	692

⁽¹⁾ As at January 1, and December 31, 2019 the insurance contract liabilities and the related reinsurance assets were both overstated by £131k. Both balances have been restated to reflect the true position. There has been no impact on retained earnings. The balances have been restated as detailed in the table below:

	As previously reported	Adjustment	As restated
	£'000	£'000	£'000
Insurance contract liabilities at January 1, 2019	7,397	(131)	7,266
Reinsurers' share of liabilities at January 1, 2019	(6,664)	131	(6,533)
Insurance contract liabilities at December 31, 2019	7,430	(131)	7,299
Reinsurers' share of liabilities at December 31, 2019	(6,738)	131	(6,607)

For the year ended December 31, 2020

14. INSURANCE CONTRACT LIABILITIES AND REINSURANCE ASSETS – TERMS, ASSUMPTIONS AND SENSITIVITIES

The Company formerly underwrote motor policies, ceasing private car business in 2004 and commercial vehicles in 2006. As a result, there is no exposure in 2007 or later years. Claims provisions are established to cover the ultimate costs of settling the liabilities in respect of claims that have occurred. The claims provision is determined on a case by case basis. No IBNR is required in respect of newly reported claims at this late stage of run-off. The claim experience is reviewed quarterly to ensure that there are no unexpected developments.

Outstanding claims provisions associated with the settlement of high value personal injury claims by way of PPOs established under the Courts Act 2003 are discounted for the time value of money. Total reserves are £8,305k (2019: £7,299k) gross and £1,025k (2019: £692k) net of reinsurance. No new claims were reported in 2020 and the provision for non-periodical payments order claims is materially nil. Whilst outstanding claims provisions for PPO claims are discounted for the time value of money, a discount rate of 0% is assumed as the assets are held as cash. The discounted and undiscounted outstanding claims provisions are therefore the same. In 2019, a discount rate of 3% was assumed as the assets held were available for sale investments. The PPO outstanding claims provisions are sensitive to the inflation rate assumed:

- An increase of inflation rate by 1% would increase the discounted PPO reserves by £1,573k gross and £429k net
- A decrease of inflation rate by 1% would decrease the discounted PPO reserves by £1,269k gross and £346k net

Loss development triangle

The total gross liability reserve as per the Balance Sheet in respect of accident years prior to 2020 is £8,305k.

The total net liability reserve as per the Balance Sheet in respect of accident years prior to 2020 is £1,025k.

No new losses have been incurred since the 2006 accident year.

Whilst the information provides a historical perspective on the adequacy of the unpaid claims estimates established on previous years, readers of these financial statements are cautioned against extrapolating redundancies or deficiencies of the past on current unpaid loss balances. The Company believes that the estimate of total claims outstanding as at the end of 2020 is adequate. However, due to the inherent uncertainties in the provisioning process, it cannot be assured that such balances will ultimately prove to be sufficient.

15. BROUGHT FORWARD RETAINED EARNINGS

During the year, it was determined that the insurance related payable (which was net of a £12k receivable balance) held on the balance sheet had been overstated. The Company concluded that the obligation to pay this liability ceased prior to the comparative year. As such, the retained earnings as at January 1, 2019 have been restated by £193k. There was no impact on the statement of cash flows and the Company has restated the December 31, 2019 balances as detailed in the table below;

	As previously reported	Adjustment	As restated
	£'000	£'000	£'000
Insurance and other receivables	4,168	12	4,180
Retained earnings	1,258	193	1,451
Insurance related payables	181	(181)	-

For the year ended December 31, 2020

16. ACCRUALS AND OTHER LIABILITIES

	2020	2019
	£'000	£'000
Other liabilities	20	20
Amounts due to related parties	87	39
Total insurance and other receivables	107	59

The carrying amounts disclosed above reasonably approximate fair values at year end.

17. RISK MANAGEMENT POLICIES

Capital management

Before closing to new business in 2006 the Company underwrote the motor business of Broker Direct Plc which commenced business operations in 1997. The Company ceased underwriting private car business, which represented the bulk of the portfolio in 2004 and the remaining commercial vehicles business in early 2006. The business was wholly written in the UK and risk exposure was confined to the UK. The Company's business operations are now limited to managing the run off of the insurance liabilities.

Insurance risk

The risk under an insurance contract is the risk that an insured event will occur including the adequacy of the price charged for the risk and uncertainty as to the amount and time of any resulting claim. The principal risk that the Company faces under such contracts is that the actual claims will exceed the carrying value of insurance contract liabilities. This is influenced by the frequency of claims, severity of claims and other factors dependent upon the type of the insurance contract. By the nature of an insurance contract, insurance risk is random and unpredictable and therefore the actual claims costs may exceed the estimated insurance contract liabilities.

To provide protection to the Company, reinsurance is purchased. Reinsurance placement is limited to a small number of highly regarded reinsurers in order to ensure as far as possible that reinsurance claims are met in full. Members of the Allianz SE Group of companies are the Company's largest reinsurers.

As the Company is no longer underwriting new business, insurance risk is confined to whether actual claims will exceed insurance liabilities. Sensitivity to the potential impact of a change in the Ogden discount rate has been considered and has been deemed not significant as the Company holds reserves for settled PPO's only.

Financial risk

The Company is exposed to financial risk through its financial assets, including reinsurance assets, insurance and other receivables and cash and cash equivalents held primarily to meet obligations under insurance contract liabilities. The key financial risk is that the proceeds from the realisation of assets are insufficient to meet the obligations under its insurance contracts. The most important aspects of financial risks comprise market risk, credit risk and liquidity risk.

(a) Market risk

Market risk is the risk that changes in market prices, such as interest rates, foreign currency exchange rates and equity prices will affect the value of the Company's assets and income.

(i) Interest rate risk

Interest rate risk is the risk that interest rates will change, adversely affecting the market value of the assets that the Company has available to meet insurance contract liabilities. None of the Company's general insurance contracts include benefits which involve contractual interest payments.

Interest rate risk is generated primarily by the long duration of the remaining PPO's. At December 31, 2020 the average duration of the asset portfolio was 1 day, after the full divestment of the available for sale financial asset portfolio, (2019: 2.1 years) compared with the mean duration of the insurance contract liabilities which is estimated to be 17.2 years (2019: 20.4 years).

For the year ended December 31, 2020

17. RISK MANAGEMENT POLICIES (continued)

(a) Market risk (continued)

(i) Interest rate risk (continued)

The table below provides a sensitivity analysis of the potential net impact of a change in interest and inflation rates and has been calculated as the direct impact of a permanent change in the rates with all other factors remaining unchanged. These sensitivities are net of reinsurance, exclude the impact of taxation, reflect one-off impacts and should not be interpreted as predictions.

	2020	2019
	£'000	£'000
Impact of a decrease in the interest rate of 1%	-	139
Impact of an increase in the interest rate of 1%	-	(109)
Impact of a decrease in the inflation rate of 1%	(429)	(253)
Impact of an increase in the inflation rate of 1%	346	311

ii) Equity risk

Equity risk is the risk of a reduction in the value of equity holdings. There is no equity risk to the company as no equities are held.

iii) Currency risk

Currency risk is the risk that fluctuations in exchange rates may lead to a significant change in the value of currency denominated assets or liabilities. All the Company's financial assets are denominated in sterling. There are no liabilities denominated in a foreign currency.

iv) Sensitivity to market risk

The table below shows the sensitivity of the Company's profit or loss before tax and equity to market risk factors.

	2020		2019	
	Profit	Equity	Profit	Equity
	£'000	£'000	£'000	£'000
Interest rate risk				
+100 basis points shift in yield curves	-	-	-	(883)
- 100 basis points shift in yield curves	-	-	-	790

Analysis of the sensitivity of profit or loss before tax and total equity to changes in the assumptions used to measure general insurance contract provisions and reinsurance assets at the reporting date has not been disclosed as there have been no significant premiums or claims in the last three years.

(b) Credit risk

Credit risk is the risk that a counterparty will be unable to pay amounts due to the Company in full when they fall due.

The Company is exposed to credit risk through its reinsurance assets, cash and cash equivalents and insurance and other receivables.

The Company manages credit risk for financial assets and cash and cash equivalents by limiting the amount of exposure to individual counterparties. This is achieved through applying a comprehensive series of limits, determined after taking into account publicly available credit ratings and other information considered relevant. These limits are dependent upon credit rating and restrict the exposure of financial assets to each counterparty or where the counterparty is a member of a group, the exposure to the group. The broad strategy is to limit the credit risk to tolerable levels whilst at the same time taking limited and controlled advantage of the additional returns which are available for additional risk.

For the year ended December 31, 2020

17. RISK MANAGEMENT POLICIES (continued)

(b) Credit risk (continued)

The Company considers the risk associated with the reinsurance assets and insurance receivables to be low as these amounts are due from regulated insurers under reinsurance contracts. Reinsurance is used to manage insurance risk. Reinsurance does not discharge the Company's liability as primary insurer. If a reinsurer fails to pay a claim for any reason the Company remains liable for the payment to the policyholder. In view of the potential long term exposure from insurance risks reinsurance security is limited to a small number of highly regarded reinsurers that offer the best long term security. Reinsurance is only placed with companies that meet the Company's strict security criteria. The largest counterparty risk at December 31, 2020 was £2,344k (2019: £3,337k).

The Company deems the risk associated with its other receivables to be low as the balance is almost entirely due from Allianz SE and as such is AA rated. The Company deems the risk associated with its cash and cash equivalents to be low as the balance is held with an A rated financial institution.

The following table provides information regarding the credit risk exposure of the Company at December 31, by classifying assets according to the credit ratings of counterparties.

	AAA	AA	Α	Not rated	Total
2020	£'000	£'000	£'000	£'000	£'000
Reinsurance assets	-	6,632	474	174	7,280
Insurance receivables	-	160	11	4	175
Other receivables	-	8,884	-	-	8,884
Cash and cash equivalents	-	-	54	-	54

For the year ended December 31, 2020

17. RISK MANAGEMENT POLICIES (continued)

Fair value hierarchy

The following table shows a three-level fair value hierarchy for financial assets held at fair value depending on the inputs used to determine that fair value. There were no transfers between the levels during the year. The fair value hierarchy has the following levels:

Level 1: quoted prices in active markets for identical assets.

Level 2: valuation techniques which maximise the use of observable market data and rely as little as possible on

entity-specific estimates.

Level 3: if one or more of the significant inputs is not based on observable market data.

All available for sale financial assets were sold during 2020.

	Total	Level 1	Level 2
Fair value as at December 31, 2019	£'000	£'000	£'000
Available for sale financial assets	35,954	18,670	17,284
Total	35,954	18,670	17,284

The following table provides information on the carrying value of reinsurance assets and insurance receivables. The Company has no financial assets or cash and cash equivalents that are impaired.

	Restated ⁽¹⁾			
	2020		2019	
	Reinsurance assets	Insurance receivables	Reinsurance assets	Insurance receivables
	£'000	£'000	£'000	£'000
Neither past due nor impaired (1)For more detail on the restatement please refer to note 13.	7,280	175	6,607	56

(c) Liquidity risk

Liquidity risk is the risk that cash is not available to settle obligations when they fall due. The Company is exposed to liquidity risk through its insurance contract liabilities. The Company has sufficient liquid assets to meet obligations as they fall due. The other receivables along with cash and cash equivalents are readily realisable. As a result, the Company's exposure to liquidity risk is low and in the risk capital model used by the Company no capital is allocated to this risk.

The following tables show information about the estimated timing of the undiscounted cashflows from the Company's available for sale financial assets and insurance contract liabilities. The analysis provided is by estimating timings of the amounts recognised in the balance sheet.

For the year ended December 31, 2020

17. RISK MANAGEMENT POLICIES (continued) (d) Liquidity risk (continued)

⁽¹⁾For more detail on the restatement please refer to note 13.

The Company holds £8,880k in a cash pool with Allianz SE which is immediately available to settle obligations when they fall due.

(d) Operational risk

Operational risk is the risk of direct or indirect loss arising from a wide variety of causes associated with the Company's processes, personnel, technology and infrastructure, and from external factors other than financial risks such as those arising from legal and regulatory requirements and generally accepted standards of corporate behaviour.

The Company's objective is to manage operational risk so as to balance the avoidance of financial losses and damage to the Company's reputation with overall cost effectiveness and to avoid control procedures that restrict initiative and creativity.

The primary responsibility for the development and implementation of controls to address operational risk is assigned to senior management within each business unit. This responsibility is supported by the development of overall Company standards for the management of operational risk. Compliance with Company standards is supported by a programme of periodic reviews.

(e) Capital management

The Company maintains sufficient capital to protect policyholders' and creditors' interests and satisfy regulators whilst creating shareholder value. The Company is regulated in respect of prudential requirements (including capitalisation) by the PRA. The Company aims to hold capital sufficient to satisfy regulatory and shareholder requirements even after the occurrence of one of a series of pre-specified financial market and insurance shocks. This risk appetite provides for a buffer above Solvency Capital Requirement ("SCR") to ensure that the company is adequately capitalised.

During the year there was a capital reduction of £32,000k, relating to excess capital held within the Company, refer to note 12 for further details. Following the capital reduction, the Company remained adequately capitalised.

The Company's capital comprises total shareholders' equity and amounts to £7,890k (2019: £39,732k). The Company has complied with all externally and internally imposed capital requirements throughout the year. At December 31, 2020 own funds amount to £7,543k with a surplus of 558% on SCR (2019: own funds amount to £39,063k with a surplus of 3,798% on SCR).

For the year ended December 31, 2020

18. ULTIMATE PARENT UNDERTAKING

The immediate parent undertaking is Allianz Insurance plc, a company registered in England and Wales.

The ultimate parent undertaking, Allianz SE, is incorporated in Germany and is the parent of the largest group of undertakings for which Allianz SE Group accounts are drawn up and of which the Company is a member.

Copies of the Allianz SE Group accounts are available on request from Allianz SE, Königinstrasse 28, 80802 Munich, Germany.

19. CONTINGENCIES AND COMMITMENTS

Legal proceedings and regulations

The Company operates in the insurance industry and is subject to legal proceedings in the normal course of business. While it is not practicable to forecast or determine the final results of all pending or threatened legal proceedings, management does not believe that such proceedings (including litigation) will have a significant effect on its results and financial position.

20. CASH FLOWS FROM OPERATING ACTIVITIES

	2020	2019
Note	£'000	£'000
Net profit before tax	541	429
Investment income 3	(677)	(783)
